Wake Forest/ Rolesville	17,025	9,948	58%
Cedar Fiber	38,500	6,400	17%
Culver City	21,000	3,516	17%
Total	182,378	81,140	44%

Ting Leased Networks Progress³

Town	Potential SAs ¹	SAs Completed ²	% Completed
Westminster	6,500	6,492	100%
Fullerton	52,500	4,293	8%
Solana Beach	7,900	4,935	62%
Encinitas	25,900	1,266	5%
Colorado Springs	222,480	0	0%
Total	315,280	16,986	5%

SA = Serviceable Address

1. Defined as projected potential premises that Ting infrastructure or Ting's partner infrastructure will have the capability to provide a customer connection in a service area once the network is completed.
2. Defined as premises to which Ting infrastructure or Ting's partner infrastructure has the capability to provide a customer connection in a service area.
3. On leased networks, Ting may not be the sole Internet service provider (ISP), or may have a head start before other providers or services. As a result, we do not expect long-term subscriber penetration to be as high as on our owned networks, where we are the sole ISP.
